# Reporting Requirements

# Confirmation of Test Keys

This report presents the findings, recommendations and data for three test items. The purpose of the analysis is to identify which test keys to include as distractors or if the test key is in need of revision to attract candidates to distractors as they select their answer. Included is data of how Upper, Middle and Lower third performers answered and the item's analysis score.

## Findings

Item 1

Too hard

Item 2

Acceptable

Item 3

Too easy

## Recommendations

Confirm key of ABD and review option ABC to ensure that it is incorrect. Statistics suggest that ABD is key.

Confirm key of AC and review option AD to ensure that it is incorrect. Statistics suggest that AD is key.

Revise distractors, particularly A and B (attracting less than 2% of test candidates).

% of candidates

### Item 1

Performers	ABC*	ABD*	ACD	BCD	TOTAL	Skips
Upper	5%	60%	8%	18%	34%	0%
	4	51	6	13	74	0
Middle	6%	54%	16%	24%	30%	0%
	4	34	10	15	63	0
Lower	4%	54%	31%	12%	36%	0%
	3	42	24	8	78	0
					100%	0%
					215	0

P+ = 0.05 Rbis = -0.0

### Item 2

Performers	A	AB	AC*	AD*	BC	BD	TOTAL	Skips
Upper	0%	0%	39%	61%	0%	0%	42%	0%
	0	0	37	58	0	0	95	0
Middle	0%	8%	26%	65%	0%	0%	42%	0%
	0	6	19	47	0	0	72	0
Lower	2%	2%	33%	56%	5%	3%	28%	0%
	3	1	20	34	3	2	63	0
							100%	0%
							228	0

P+ = 0.05 Rbis = 0.05

### Item 3

Performers	A	B	C*	D	TOTAL	Skips
Upper	0%	0%	99.6%	0.4%	32%	0%
	0	0	261	1	262	0
Middle	0%	0%	98.1%	2%	33%	0%
	0	0	263	5	268	0
Lower	0.2%	0.3%	92.5%	6%	34%	0%
	3	1	258	17	279	0
					100%	0%
					809	0

P+ = 0.96 Rbis = 0.26

\*Correct option

♦ Option that completed the form with the correct answer (key).

P+ value: If > 0.32, the item is too easy. If < 0.30, the item is too hard.

Rbis value: Correlation between performance on an item and total performance. A value less than .20 is considered to not be discriminating well. In other words, the higher performers tend to answer this item incorrectly and the lower performers tend to answer incorrectly.

Prepared for CUSTOMER NAME, April 2, 2013

Evaluation Criteria	0 Points	1 Point	2 Points	3 Points	4 Points
Uses basic spreadsheet software (Excel, Open Office, etc.) for data visualizations	Does not use basic spreadsheet software	x	x	Uses basic spreadsheet software	
All required components are present	One or more is missing	All are present	X	X	X
All components fit on one page	Does not fit on one page	Fits on one page	X	X	X
Text is legible	No text is legible when printed on 8.5 x 11 paper	Some, but not all, text is legible	All text is legible	X	X
Data visualizations are easily interpreted	Even those who know the data well cannot understand what several graphs are saying	Even those who know the data well cannot understand what one or two graphs are saying but the rest are interpretable	With insider knowledge, someone could interpret the data visualizations	With a little effort and a little knowledge of ICA, someone could interpret the data visualizations	Someone unfamiliar with the data could interpret the data visualizations
Transfer of graphs from spreadsheet to report is easy	Impossible to implement without original designer	Can be implemented without original designer but requires substantial training	Can be implemented independently but requires some experience	Can be implemented independently but requires a substantial amount of time but minimal experience is required	Can be implemented independently but requires very little time no experience is required
Report uses best practices in data visualization design					
Layout and use of space	Report is very cluttered and feels disorganized	Report is somewhat cluttered and feels busy	Report is uncluttered and feels clean	X	X
Use of color and contrast	Colors clash or do not contrast well, do not use ICA color scheme	Colors work okay but does not use ICA color scheme	Colors contrast well, use ICA color scheme	X	X
